

# YOUR ASSIGNMENT IS . . .

Month: May

Assignment: Use Your Camera to Show Motion in the Image

Summary: Our “internal cameras” compute images at a rate of approx 1/30 sec, hence the standard video frame rate of 30 fps. What we can't do that our cameras do well is to capture images over a longer period of time and then “blend” the motion in the scene into a single image  
See the references below for details.
